**BIG
RETURNS**

**MEAN
NOTHING**

**WITHOUT
TRUST**

You've probably been pitched half a dozen "alternative investments" lately. That's the world we're in now. Everyone's hunting for income outside stocks and bonds.

What Matters

The part most of those pitches skip is the uncomfortable one: alternatives don't just differ by return. They differ by who's actually behind them. Longevity, payment history, audited financials, and access to institutional capital matter a lot more than a flashy headline yield.

Track Record

Experity Ventures has been operating since 2009 and has issued multiple investment offerings through market cycles. To date, every dollar of investor principal and every contracted interest payment across those offerings has been paid as scheduled. We've also been named to the Inc. 5000 list three years in a row and provide GAAP-audited financials from a U.S. audit firm as part of investor due diligence.

Built Different

Plenty of firms promise eye-popping returns because they need capital just to keep the lights on. Our model is different. Experity's litigation finance platform, Thrivest Legal Funding, is supported by hundreds of millions in senior capital from institutional partners, allowing us to focus on disciplined underwriting and cash-flow management instead of chasing yield.

Talk?

If you're open to seeing what a scaled, audited, income-focused litigation finance platform actually looks like, would it make sense to schedule a short call this week?
